NYXIS

3D Game Artist | Stylized Environments & Props

About Me

Hi everyone, I'm **Nyxis** — a self-taught, independent 3D Game Artist. I'm currently a student, working freelance to support my own studies and expenses while doing what I love: creating 3D art for games.

This asset is released for **free** for the community. If you find it useful, please consider supporting my work — your support helps me keep creating and sharing more free assets like this one.

What I Do

- Low-poly & stylized 3D props and environments
- Handpainted textures with a stylized gradient look
- VR-optimized, atlas-mapped assets for real-time performance
- Open-world environment design and layout
- Custom Unity shaders and full scene/environment setup
- Support for PC, Mobile, and VR platforms

Support My Work

If you'd like to see more free, high-quality assets like this, please consider supporting me. Every bit of support directly helps me continue creating and sharing assets with the community — as a student, this means a lot.

Available for Freelance Work

I'm available for any kind of project — low-poly, stylized, handpainted, realistic, or VR-optimized. Whether it's for PC, Mobile, or VR, I can create custom props, environments, and shaders tailored to your game's needs.
